PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8709

SESSION NUMBER: 1

DATE OF SESSION: 10 AUG 87

TARGET COUNTRY:

REFERENCE:

MISSION STATUS:

TECHNIQUE UTILIZED: CRV

SOURCE IDENTIFIER: 018

1. (S/NF/SK) Monitor Tasking:

2. (S/NF/SK) Source Tasking: Only the encrypted coordinates were initially provided. After source perceived the whine of jets and produced the AOL of "jet aircraft", the monitor indicated that source had acquired "the target".

3. (S/NF/SK) Summary: Source summary attached.

4. (S/NF/SK) Comments: Because of the nature of the tasking, the "ownership" of the initially perceived aircraft cannot easily be established--is it UR or US? Subsequent sessions will hopefully resolve this problem. Monitor feels that the source addressed the task immediately, but began producing AOL as a result of the monitor pushing too hard for information. Consequently, only the first part of the session (pages 1-7) should be considered "clean". Source's sketching ability is minimal, at best, but the monitor plans to try again.

memorandum

DATE: 11 August, 1987

REPLY TO
ATTN OF: DT-SSUBJECT: SESSION SUMMARY, PROJECT 8709 (C-SS)
SG1J

TO: DT-S (ATTN: [REDACTED])

1. (S-SS) Statistics:

Project #: 8709
 Viewer: 018
 Session date: 10 AUG 87
 Filename: 8709.L01

2. (S-SS) Impressions gained from the session include:

a. The first impression is that of a flat area. It has long, paved runways. It appears to be an airport.

- 1) At this location is a sleek, modern-looking plane. It is silvery, with a black "bubble"-looking area on top (AOL: cockpit). The plane is a jet.
- 2) I keep getting the impression of a symbol of circles within circles, but this may be AOL, as well (this is not listed in the transcript).
- 3) There is a man here, (AOL: presumably the pilot), who is tall, thin, seems to have a moustache, and somewhat dark skin, although he is caucasian.
- 4) The plane has a strange "feel" to this man. It has a "plastic" feel; it just doesn't "sit" right, and feels too small to him. The seat is too close to the floor.

b. There is also a set of impressions of a second plane. ← ?

- 1) This plane has much squarer lines, and is seen as being out over the ocean.
- 2) The pilot of this plane has an excited feeling, (AOL: much like that of an understudy who suddenly finds himself on stage playing the part for real).
- 3) Further considerations (after the session) bring out the feeling that these impressions may be of the same pilot, but at a much earlier time (years ago).

2. Viewer's critique: (S/SS) I feel that the impressions from this session are good, but remain confused as to the relationships of their contents.
